1. Applicant should note the changes to patent practice and procedure:
 - A) effective December 01, 1997 as published in the Federal Register, Vol 62, No. 197, Friday October 10, 1997; and
 - B) effective November 07, 2000 as published in the Federal Register, Vol 65, No. 54603, September 08, 2000.
2. The disclosure is objected to because of the following informalities:
 - A) applicant must update:
 - (1) the continuing data on page 1,
with the current status of each of the referenced applications, e.g., --now abandoned--,
or --now patent #?--, or --which is abandoned and now serial number #?--, etc.
 - B) the following errors have been noted in the specification:
 - (1) as can be seen in figs 4, 6 & 7 and from the context of the paragraph at page 39, ,lines 10-19, "In the article specifications information database 35, there ... articles upon shipping thereof.", at line 1 of this paragraph "35" should be -31--.

Appropriate correction is required.

3. The specification and drawings have not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification or drawings. Applicant should note the requirements of 37 CFR § 1.74, § 1.75, § 1.84(o,p(5)), § 1.121(a)-1.121(f) & § 1.121(g)-1.121(h).

4. Claims 1-8 are rejected under the judicially created doctrine of double patenting over claims 1-33 of U. S. Patent No. 6,226,617 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

- 4.1 The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows:

- A) obtaining information about an article to be treated, information about the components of the article and the properties of the components;

B) treating the article by removing the components of the article based on the properties of the components of the article; and

C) treating the component parts of the article using separate treatment processes.

4.2 Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

4.3 The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

4.4 A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

4.5 Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. The following is an Examiner's Statement of Reasons for Allowance over the prior art:

A) the prior art, for example either Manchak, Jr. et al (4,839,061) or Hansen et al (5,072,833) or Sturgeon et al (5,664,112) disclose the processing of hazardous materials pursuant to applicable laws/rules/regulations.

B) however, in regard to claims 1, 4 & 7, the prior art in the environment of treating hazardous waste does not teach or suggest the processing and treatment of hazardous waste at a facility, which includes:

- (1) obtaining identifying information concerning the components and properties of a component are obtained from the article to be treated;
- (2) the components of the article to be treated are removed; and
- (3) the separated components are treated using different processes based on the obtained information.

Claims 2, 3, 5, 6 & 8 are allowable for the same reason.

6. The shorten statutory period of response is set to expire 3 (three) months from the mailing date of this Office action.
